EUROLIVE B12X

1000 Watt 2 Way 12" Powered Loudspeaker with Digital Mixer, Wireless Option, Remote Control via iOS* / Android* Mobile App and Bluetooth Audio Streaming

- High-power 1000-Watt 2-way PA sound reinforcement speaker system for live and playback applications
- Remote control 3-channel digital mixer with gain setting recall
- "Wireless-ready" for high-quality BEHRINGER digital wireless system (not included)
- Comprehensive remote control via iOS*/ Android* mobile app available free of charge
- High quality Bluetooth* stereo audio streaming
- DSP presets for application type and speaker positioning
- KLARK TEKNIK Digital Signal Processing for total system control
- Revolutionary Class-D amplifier technology: enormous power, incredible sonic performance and super-light weight
- Extremely powerful 12" long-excursion driver provides incredibly deep bass and acoustic power
- State-of-the-art 1" phenolic-diaphragm compression driver for exceptional high-frequency reproduction
- Intuitive single rotary control user interface with LCD display for ease of navigation
- Ultra-wide dispersion, large-format exponential horn

The EUROLIVE B12X active loudspeaker is exactly what you've come to expect from **BEHRINGER** – more power, more features and absolutely more affordable! Our engineers have created a powered loudspeaker that merges 1000-Watt Class-D power amp technology, a 3-channel digital mixer with gain setting recall that is "wireless ready" for our ULM Series digital microphones (available separately), integrated DSP – and exceptional portability. Then we loaded the B12X with our best 12" long-excursion driver for incredibly deep bass, and a state-of-the-art 1" phenolic-diaphragm compression driver for exceptional high-frequency reproduction. Built-in Bluetooth connectivity allows you to stream music from your smart-phone, tablet or other Bluetooth-equipped device – and you can even control the system via our free iOS*/ Android* mobile apps. The B12X professional active loudspeaker is destined to become a legend in its own right, alongside the other EUROLIVE models that have made **BEHRINGER** the world leader in active loudspeakers.

Portable Speakers

EUROLIVE B12X

1000 Watt 2 Way 12" Powered Loudspeaker with Digital Mixer, Wireless Option, Remote Control via iOS* / Android* Mobile App and Bluetooth Audio Streaming

- Versatile trapezoidal enclosure design allows different positioning:
 - Stand mounting with 35-mm pole socket
 - Tilts on its side for use as a floor monitor
- Ergonomically shaped handles for easy carrying and setup
- 3-Year Warranty Program*
- Designed and engineered in Germany

Built-in Digital Mixer – Comprehensive Remote Control

The B12X features a fully addressable onboard digital mixer with two combo jack/XLR connectors that accept balanced and unbalanced connections for dynamic mics and line-level instruments. The simple and intuitive user interface consists of a single rotary push-encoder with Process, Setup, Exit and Enter function buttons. A beautifully-backlit LCD display controls DSP functions including mixer parameters, 3 band EQ and presets. All settings can be controlled locally, or via the free downloadable iOS*/ Android* mobile apps – and locked down to prevent unauthorised access.

Own the Stage with Digital Wireless

Get wireless-ready with the built-in, dedicated connectivity of our ULTRALINK ULM Series wireless microphone system. Wireless gives you maximum freedom and mobility without the need to run cables. The highest-quality sound is provided thanks to the ULM's digital, license-free 2.4 GHz frequency spectrum.

The ULM wireless system combines professional-quality sound with simple setup and an intuitive interface for legendary audio performance right out of the box. Just plug in the ULM receiver "dongle", and instantly you have an exceptional wireless mic system. Freeing you from cables is the simply easy way to own the stage.

Big on Bluetooth

We know your music lives on your phone, computer or tablet, so we've made it easy to access and play through the B12X. With a simple swipe of your finger, you can instantly stream all of your favorite music from any Bluetooth-equipped device, such as your computer, smart phone or tablet. Streaming music via Bluetooth Technology opens up a tremendous amount of available content, such as a virtually limitless array of online radio-channels, multimedia providers and much more. Imagine that you have the whole PA at your fingertips; control the party from the dance floor or the background music comfortably from your chair. Simple, easy and amazing!

KLARK TEKNIK – Inspired Technology

KLARK TEKNIK is recognised worldwide as one of the most prestigious British audio companies, with a 40-year pedigree and even a TEC Lifetime Achievement Award to back it up. The Company has designed and manufactured products for world-class artists, and their legendary DN780 reverb processor is considered by leading audio engineers around the world as the industry standard. Check out their website to learn more about KLARK TEKNIK's legendary heritage.

BEHRINGER is proud to incorporate custom-engineered KLARK TEKNIK Class-D amplifier and DSP technologies into their products.

DSP – Secret to Superb Sound

From the instant your signal enters the B12X, the built-in KLARK TEKNIK DSP takes over ensuring the highest possible signal integrity. Much more than just selective EQ enhancement, the 24-bit processor analyses the incoming signal and intelligently applies specific filters to actually improve the sound quality. It's like having an audio engineer monitoring the input and output signals, dialing in the perfect EQ and constantly making subtle adjustments to the crossover, compressor/limiter and more – all of which adds up to significantly better sound.

Class-D - Massive Power, Perfect Sound

Thanks to our revolutionary Class-D amplifier technology, we are able to provide you with enormous power and incredible sonic performance in an easy-to-use, ultra-portable and lightweight package. Class-D amplification makes all the difference, offering the ultimate in energy efficiency and eliminating the need for heavy power supplies and massive heat sinks. This amazing technology makes it possible to design and build extremely powerful products that are significantly lighter in weight than their traditional counterparts, while using less energy and protecting the environment.

Bi-Amplification - The Path to Absolute Signal Integrity

With its 1000 ultra-clean Watts of digital output delivered through separately-powered drivers, courtesy of true bi-amping (2 amplifiers per speaker system), the B12X delivers high-resolution sound that really brings out the best in your music. While some of our competitors apply simple passive crossovers, which inaccurately separates the frequency spectrum and degrade driver performance, **BEHRINGER** has gone the extra mile – driving each woofer and tweeter with a separate amplifier for absolute signal integrity.

Custom-Engineered Transducers

Powerful, high-efficiency Class-D amplifiers and Switch Mode Power Supply technology coupled with state-of-the-art DSP functionality sure sounds impressive – but what about the part of the system you actually hear? We never cut corners on our transducers (woofers and tweeters), and we never just pull what we have off the shelf. Our LF (Low Frequency) and HF (High Frequency) transducers are designed specifically for each application – it's what sets us apart from the competition. When you buy a **BEHRINGER** active loudspeaker, you can rest assured the transducers inside have been engineered to perform flawlessly with every other element for truly professional results. The B12X cranks out massive quantities of low end, with articulate, detailed mids and crystal-clear highs.

Extraordinarily Versatile

Thanks to its trapezoidal shape, the B12X is suitable for a wide variety of applications, such as mounting on standard speaker poles, vertical placement atop subwoofers, or even laid on the side for use as onstage monitor wedges. The B12X's extraordinary fidelity and frequency response make it a favorite of public speakers, vocalists and instrumentalists alike. Hookup is simple, requiring only a single XLR or ¼" cable from your mixing console and power – and if you're just streaming Bluetooth, it's even easier. Additional active loudspeakers can be chained together via the XLR Link Output jack on the rear panel.

Which Speaker Should I Buy?

Well, let's start with your application... are you giving a speech at the company picnic – or rocking out at the local bar or dance club? Whether to choose one speaker cabinet over another depends on your bass requirements. A 15" woofer has about 40% more surface area with which to move air than a 12", and that translates into more bass. So if you're addressing a small meeting, or jamming at the coffee house, the B12X might be all you'll ever need. But if you're providing disco in a busy nightclub, hosting jam night in your party room, or just need to crank it up louder, then a pair of B15Xs may be a better choice.

Sound Value

The BEHRINGER B12X stands head and shoulders above the rest of the pack and delivers exceptional performance, even when pushed to the limit. Lightweight and powerful, with built-in wireless connectivity, **KLARK TEKNIK** DSP, Bluetooth streaming, 1000-Watt bi-amplified Class-D power and custom-designed transducers, the B12X active loudspeaker is ideal for both speech and music applications – at a price that is unheard of in this class.

Experience the B12X at your local dealer today, or get yours online, and find out why more and more professionals are turning to **BEHRINGER EUROLIVE** Series active loudspeakers for their superb performance and extraordinary value.
